

Blast Parts Media Ltd are a leading stock holder and supplier of shot blast abrasives for a wide range of applications from surface preparation, substance removal to high quality finishing, engraving, etching and profile cutting.

Our blast media range includes:

-  Aluminium Oxides
-  Steel/Iron Grits
-  Steel Shot
-  Glass Bead
-  Garnet (Water Jet & Dry Blasting)
-  Non-Toxic Plastics
-  Specialist Materials (Walnut Shell & SCA)

All the abrasives are available in a wide variety of grades to cover all applications, as well as Aero-space & Rolls Royce approved standards if that's what you require.

We also offer experienced machine servicing by our highly qualified Service Engineers and can provide high quality wear resistant spares and PPE equipment. All this giving you the satisfaction that your machine is kept to the highest & safest optimal performance standard possible.

We specialise in dealing with all sizes of orders so whether it be a one off 25kg bag or a door to door rolling order for tonnage, you can rest assured we treat each job and customer with the same high levels of importance.
